PCT

NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY **EXAMINATION REPORT** 

(PCT Rule 71.1)

Date of mailing (day/month/year) 25.05.2001 Applicant's or agent's file reference IMPORTANT NOTIFICATION 340623/18441 International filing date (day/month/year) Priority date (day/month/year) International application No. 17/02/1999 17/02/2000 PCT/FR00/00394 PIERRE FABRE MEDICAMENT et al.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected 2. Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
- REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the International preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

	I. Basis of the report				
1. With regard to the elements of the international application:*					
	the international application as originally filed				
$\boxtimes$	the description:				
<del></del>	pages 1-20		, as originally filed		
	pages		, filed with the demand		
	pages	, filed with the letter of			
<b>E</b> 3					
$\bowtie$	the claims:				
	pages 1-24		, as originally filed		
	pages	, as amended (together with any stat	ement under Article 19		
	pages		, filed with the demand		
	pages	, filed with the letter of			
$\boxtimes$	the drawings:				
	pages 1/2-2/2	<u> </u>	, as originally filed		
	pages		, filed with the demand		
	pages		1		
ا لـــا	he sequence listing part of the description:				
	pages				
	pages				
	pages	, filed with the letter of			
the in Thes	regard to the language, all the elements marked above were nternational application was filed, unless otherwise indicated e elements were available or furnished to this Authority in the the language of a translation furnished for the purposes of it the language of publication of the international application the language of the translation furnished for the purposes or 55.3).  The regard to any nucleotide and/or amino acid sequence minary examination was carried out on the basis of the sequence.	under this item. e following language nternational search (under Rule 23.1(b)). (under Rule 48.3(b)). of international preliminary examination the disclosed in the international application	which is: (under Rule 55.2 and/		
	contained in the international application in written form.	<u>-</u>			
	filed together with the international application in compute	r readable form.			
	furnished subsequently to this Authority in written form.				
		ble form			
	furnished subsequently to this Authority in computer readable form.  The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.				
	The statement that the information recorded in compute been furnished.	r readable form is identical to the writte	en sequence listing has		
4.	The amendments have resulted in the cancellation of:				
	the description, pages				
	the claims, Nos.				
	the drawings, sheets/fig				
5.	This report has been established as if (some of) the amend beyond the disclosure as filed, as indicated in the Suppleme	ments had not been made, since they have ntal Box (Rule 70.2(c)).**	e been considered to go		
* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).					
** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.					

International application No.

# PCT/FR00/00394

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability				
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:				
the entire international application.				
Claims Nos				
because:				
the said international application, or the said claims Nos. 1-16 relate to the following subject matter which does not require an international preliminary examination (specify):				
See separate sheet.				
the description, claims or drawings (indicate particular elements below) or said claims Nos				
See separate sheet.				
·				
the claims, or said claims Nos are so inadequately supported				
by the description that no meaningful opinion could be formed.				
no international search report has been established for said claims Nos.				
2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:				
the written form has not been furnished or does not comply with the standard.				
the computer readable form has not been furnished or does not comply with the standard.				

PCT/FR 00/00394

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: III.

- 1. The present Authority considers that the subject matter of claims 1-16 is covered by the provisions of PCT Rule 67.1(iv). For this reason, no opinion will be given on the question of whether the subject matter of these claims is industrially applicable (PCT Article 34(4)(a)(i)).
- 2. The subject matter of claim 17 has not been clearly defined because it does not include technical features. For this reason, it is not possible to form a meaningful opinion regarding the novelty and inventive step of this claim.

International application No.

PCT/FR 00/00394

V.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
	citations and explanations supporting such statement

1.	Statement			
	Novelty (N)	Claims	1-16, 18-24	YES
		Claims		NO
	Inventive step (IS)	Claims	1-16, 18-24	YES
		Claims		NO NO
	Industrial applicability (IA)	Claims	18-24	YES
		Claims		NO NO

#### 2. Citations and explanations

The following documents cited in the search report are mentioned in the present written opinion. The numbering given below will be used throughout the rest of the procedure:

D1: JOURNAL OF IMMUNOLOGY, vol. 160, no. 4, 1998, pages 1750-1758

D2: EUROPEAN JOURNAL OF BIOCHEMISTRY, vol. 255, 1998, pages 446-454

D3: RESEARCH IN IMMUNOLOGY, vol. 149, no. 1, 1998, page 99

Document D4 is not cited in the international search report. A copy of the <u>abstract</u> of this document is attached:

D4: IMMUNOLOGICAL REVIEW, vol. 146, 1995, pages 57-79

#### 1. Novelty

The subject matter of claims 1-16 and 18-24 is considered to be novel (PCT Article 33(2)) because none of the documents cited in the search report

discloses the combined use of an OmpA protein and a peptide having sequence SEQ ID NO 3 ELAGIGILTV.

#### 2. Inventive step

2.1 Document D1, which is considered to be the closest prior art, describes the use of the peptide antigen having the sequence ELAGIGILTV (page 1752, table no. 2) to generate a cytotoxic T cell response directed against melanoma cells (page 1757, right-hand column, paragraph 2). The peptide can be attached to HLA-A\*0201 (abstract). Said peptide could be used as a pharmaceutical preparation (vaccine) for causing strong anti-tumour CTL responses (page 1757, right-hand column, paragraph 2).

Therefore, a vaccine has been theoretically suggested but not produced.

The subject matter of independent claims 1 and 19 differs from D1 in that the peptide described above is associated with a protein (OmpA) when it is used for preparing a pharmaceutical composition for generating a cytotoxic T cell response directed against melanoma cells.

The effect of the presence of protein OmpA is such that it causes a strong CTL response directed against melanoma cells.

The problem that the present invention is intended to solve can thus be considered to be that of providing a pharmaceutical preparation that also does not require additives.

The problem is solved by providing a pharmaceutical

International application No.

PCT/FR 00/00394

preparation containing the antigen described above in combination with an OmpA protein.

This solution cannot be derived from any prior art document or from any combination of a plurality of such documents. Therefore, independent claims 1 and 19 are considered to be inventive (PCT Article 33(3)).

- 2.2 The same applies to dependent claims 2-16 and 18-24.
- 3. There are no uniform criteria in the PCT for determining whether claims 1-16 are industrially applicable. Patentability may also be dependent on the way in which the claims are worded. Therefore, the European Patent Office does not consider the subject matter of use claims relating to the medical use of a compound to be industrially applicable. However, claims relating to a known compound, for a first medical use, will be accepted, as will claims relating to the use of such a compound for producing a drug with a view to a novel medical treatment.

PCT/FR 00/00394

VII.	Certain	defects	in the	international	annlication
, TT.	Certain	aciects	m unc	mici national	I ADDIICALIVII

The following defects in the form or contents of the international application have been noted:

Contrary to the requirement of PCT Rule 5.1(a)(ii), the relevant prior art disclosed in document D3 has not been indicated in the description, nor has this document been cited.

#### VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

- 1. Since the expression "a fragment thereof" used in claims 1-4, 8, 10, 12 and 21 as well as the term "nucleic construct" used in claims 13 and 19 have a relative meaning, they do not have a well established and recognised meaning. It follows that they cast doubt on the meaning of the technical features to which they refer, and the subject matter of said claims has not been clearly defined (PCT Article 6).
- 2. Claim 17 is unclear (PCT Article 6) because it has not been defined in terms of a technical feature.
- 3. The use of the expression "fragment with at least 5 amino acids" in claims 6, 18 and 19 does not have a specific meaning and renders the claims unclear (PCT Article 6). Said expression also covers substances that are not capable of solving the technical problem addressed by the present application.
